BACHELOR OF INTERIOR ARCHITECTURE & DESIGN

The interior architecture & design program prepares students for the interior architecture and design practice in a variety of design firms. The Bachelor of Interior Architecture & Design program focuses on project-based learning and human-centered and global design perspectives. Students are prepared for practice through a sequence of studio, lab, and lecture classes where they address the design of diversified typologies of interior environments in the commercial and residential sector: hospitality, healthcare, retail, workspaces, community and public spaces, transit spaces, and exhibit and temporary spaces. The program offers students opportunities for international experiences both on campus and internationally. Students must complete 180 quarter credits, which typically requires 4 academic years of full-time study (based on 3 quarters of attendance annually). Note: The DES designator implies an interdisciplinary course to be taken by design and built environment undergraduate majors, including architecture, interior architecture & design, construction management, and Graphic Design & Interactive Media.

Electives for the Bachelor of Interior Architecture & Design

Nonrequired interior architecture & design courses, as well as professional courses in architecture, construction management, gaming, design studies, product design, and Graphic Design & Interactive Media courses, can be taken as professional electives.
